

# Proposed timeline

## What will be left at the end?

Once a section is complete, we will reinstate the land. In this section, a new valve house and access point will remain at each compound after the work is complete.

## What our proposals mean for the local area

Securing fresh drinking water for generations

The creation of jobs locally and in the North West

Huge investment into local and regional economy

Opportunities to improve our local area and engage communities

Regional health benefits
