

# Proposed changes to construction traffic management in Rossendale

Following consultation feedback from Lancashire County Council (LCC) Highways since submitting our planning application to Rossendale Borough Council in April 2021, we have made changes to our proposed construction traffic routes for the New Hall Hey and Townsend Fold WTW Compounds to reduce the impact on Rawtenstall Gyratory.

We are also proposing alterations to the Tesco Haslingden roundabout to address LCC Highways concerns regarding U-turning Heavy Goods Vehicles (HGVs) accessing the Haslingden Road Compound. We have submitted an update to our planning application to reflect these changes and our updated proposals.

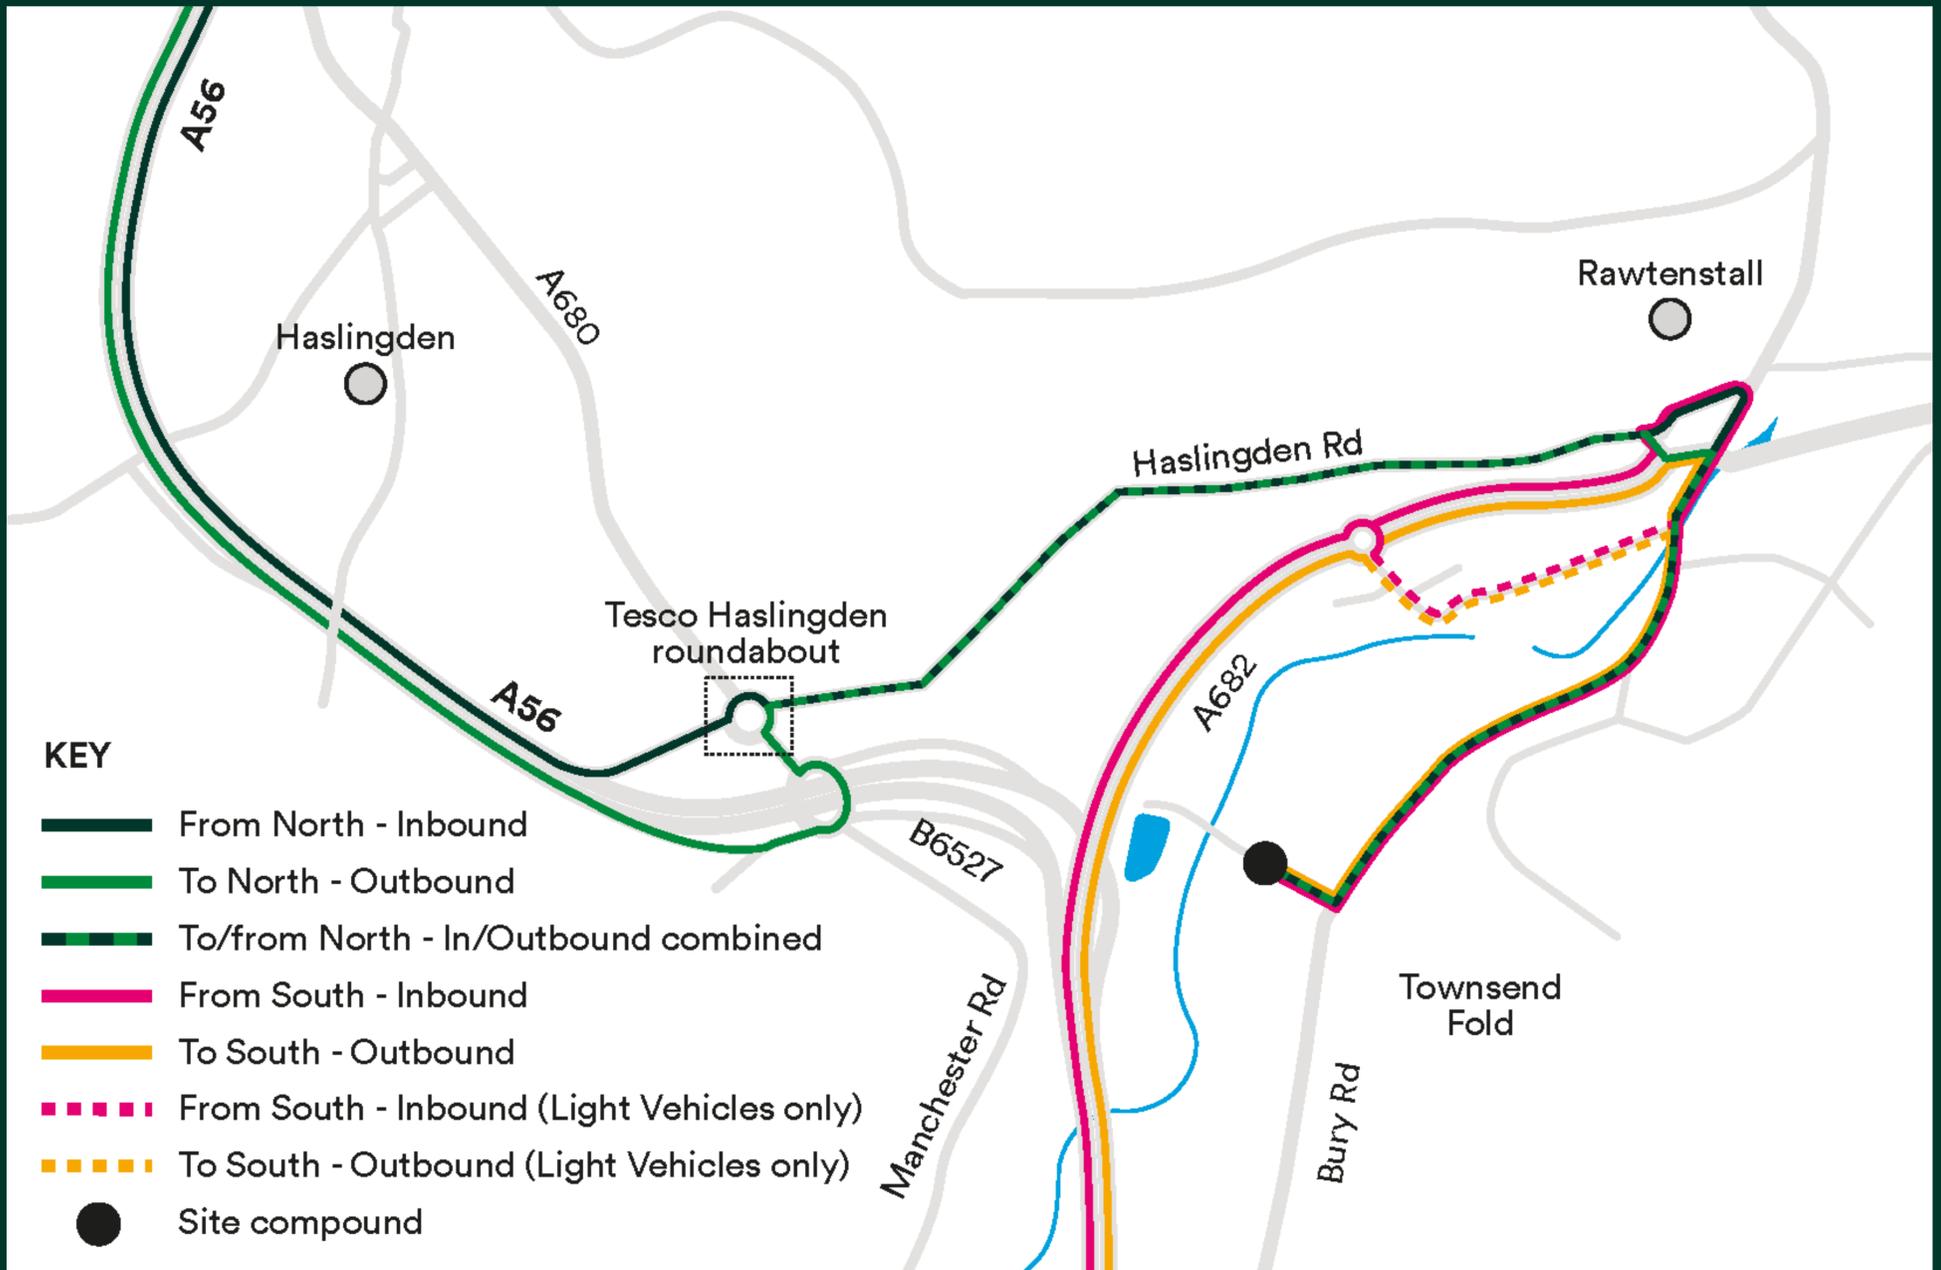

## What are the changes?

For construction vehicles to access the New Hall Hey Compound we are no longer proposing to use the A681 Haslingden Road, Rawtenstall Gyratory and northern section of the A682. All vehicles would now use the A56, A682 and New Hall Hey Road. Our construction vehicles travelling from and to the north would travel down the A56 to the Edenfield Roundabout where they would undertake a U-turn before travelling back up the A56 as illustrated in the map to the right.

For construction vehicles to access the Townsend Fold WTW Compound we have added an option for Light Goods Vehicles (LGVs) to travel along New Hall Hey Road between the A682 and Bury Road as illustrated in the map below. LGV drivers will be encouraged to use New Hall Hey Road rather than Rawtenstall Gyratory when travelling to and from the south.

This will be monitored during construction.

The alterations to Tesco Haslingden roundabout would include creating a smaller central island, altering the arms of the roundabout, defining running lanes with road markings, and creating a larger road area. We would put in place additional pedestrian signage and material and markings on the ground to improve safety for non-motorised users.

The location of the roundabout is indicated on the maps above.

#### Next steps

The above is detailed in a second Supplementary Environmental Information report that has been submitted to Rossendale Borough Council as part of the planning application process.

As the planning authority, Rossendale Borough Council will make this information available online, seek input from consultees, and be open to receive comment on the changes.
